CIRCULAR: ARTIFICIAL INTELLIGENCE FOR CLASS XI

Dear Parents & students,

Greetings from Indian School Muscat!

Machines have become a lot smarter in the last 50 years. Artificial Intelligence (AI), once a radical concept among computer scientists in the 1950s, now has more practical applications in our day-to-day lives than some people realize. AI powered technologies now play a vital role in marketing, finance, data analysis, healthcare, and much more.

AI is a technology that is transforming every walk of life. It is a wide-ranging tool that enables people to rethink how we integrate information, analyze data, and use the resulting insights to improve decision making.

Indian School Muscat is planning to start Artificial Intelligence (AI) as a core subject for the students of Classes XI from the current academic year 2022-23 and continue for the Class XII students appearing for the Board Examinations in March 2024. The eligibility for the subject will be as per the same norms for the existing subject Computer Science.

Those students who are interested in pursuing this course are requested to fill up the online expression of interest using the following link on or before **Monday, 6th June 2022.**
