CIRCULAR - APTITUDE TEST FOR CLASS X

Dear Parents,

Greetings from Indian School Muscat!

A right career choice and planning is the key factor in determining success in career and at the workplace. In order to enhance the career decision making process of students, CBSE has introduced a free career information giving portal for all students of classes IX onwards. Please visit <https://cbsecareerguidance.com> for registering your ward for availing CBSE provided career information from the portal. The portal is equipped with a dashboard with detailed information on Scholarships, Colleges and various competitive examinations.

As part of the career guidance program at our school, we will be conducting an online career assessment of students of Class X. The online assessment tool will assess aptitude, personality and career interest. On completion of the career assessment a detailed career report will be generated. The career report will give an analysis of student's aptitude, personality and interest along with career fitment among various career clusters. The stream fitment analysis, in the report may be referred for subject selection for Class XI. This will be followed by individual career counselling session by the school counsellors.

Though the grades scored during the class X examinations will be the criteria for the school to allot the streams for students in class XI, the career report and career counselling will provide the students an understanding of their 'self' so that they can make a better choice for their future course of study.

If you are interested in your ward's participation in this online testing, you may **register** his/her name with the class teacher on or before **Thursday, January 13, 2022** by sending through your ward the test fee of RO 5/- (Riyal Omani five only).

Further details of the testing will be notified after the counselling centre receives the complete list of registered students.

With warm regards,

Dr Rajeev Kumar Chauhan
Principal
