NOTE MAKING & SUMMARIZATION

Note making is an advanced writing skill which is acquiring increasing importance due to knowledge explosion. There is a need to remember at least the main points of any given subject. Note making is a useful skill which comes in handy not only in attempting questions but also in preparing you for life. Notes form an essential part of your academic life & help you in the following ways.

- o Notes help you to remember the information you have gathered.
- o Notes come in handy for making quick revision before exams.
- o Lengthy lessons can be condensed into short relevant pieces by making notes.
- o Notes help in understanding the texts better.

How to make notes

- Read the passage carefully.
- **Heading**
What is the main idea of the passage? Frame a heading based on the central idea and write it in the middle of the page.
- **Subheadings**
How has the main idea been presented and developed? Are there two or three subordinate/associated ideas? You can frame subheadings based on these.
- **Points**
Are there further details or points of the subtitles that you wish to keep in these notes? Indent, i.e., suitably space and number. All subheadings should be written at a uniform distance from the margin.
- **Indenting**
All points should also maintain the same distance away from the margin.

Important characteristics of note-making:

- Do not use complete sentences.
- The main points and supporting details are clearly distinguished.
- Certain words are often dropped: articles, words that are repeated, verbs which can be understood in the context, relative pronouns, conjunctions etc. but not at the cost of clarity.
- Avoid unnecessary facts, examples, illustrations etc.
- Condensed information is organized and recorded in a systematic manner that brings out the structure of the original text.
- Headings and supporting details are numbered.

- Provide Key to the abbreviations used at the end.
- Use abbreviations, symbols and numbers wherever necessary. Use standard abbreviations and symbols as far as possible.

Your notes should look like this

	HEADING
	1. Sub-heading 1
	1.1 Sub-point 1
	1.2 Sub-point 2
	1.3 Sub-point 3
	1.3.1 Sub sub point
	2. Sub- heading 2
	2.1 Sub point 1
	2.2 Sub point 2
	2.3 Sub point 3
	3. Sub-heading 3
	3.1 Sub point 1
	3.2 Sub point 2
	3.3 Sub point 3

Notice that indenting, i.e., shifting from the margin has been used to clearly indicate subheadings, points and sub points. Subheadings, though separated by points, occur below one another. Points come below one another, and sub points to these are further indented. Such use of indenting gives your notes a visual character. At a glance you can see the main idea and its aspects.

You may also use other forms of numbering like:

1. _____
 - a).....
 - b).....
 - c).....

2. _____
 - a)
 - (i)
 - b).....
 - c).....

3. _____
 - a).....
 - b).....

-
- c).....
 - (i)
 - (ii)

SUMMARIZATION

Summarizing and note-making go together. In fact the next step to note-making is writing a summary. The point to bear in mind is that the notes we make on a subject can either be expanded into a detailed account or condensed into a summary. The summary is written on the basis of the notes made on the text. The summary should not exceed 80 words depending on the length of the text.

STEPS IN WRITING A SUMMARY:

1. Read the text and make notes (as discussed in note-making)
2. Use the notes and make a draft summary without referring to the original text.
3. Read the draft summary to ensure that you have included all the main points. At the same time, make sure that it does not exceed the word limit.
4. Delete all unnecessary details.
5. Check the language for its correction and precision.
6. The summary should be within the word limit.

TIPS FOR MAINTAINING PRECISION:

1. Avoid repetition of subject.
2. The summary should be in normal English and not in ‘note form’ which means that they should be written in complete sentences, but they have to be short.
3. No abbreviations and symbols should be used.
4. Write the summary based on the notes that you have made without going back to the text. It will help you to achieve good results.
5. Your summary should read as a single coherent paragraph.

Abbreviations

Making your own abbreviations:

- a. Keep the main sounds of the word. For example, edn. (education), prog. (programme).
- b. You should not abbreviate every word.
- c. As a general rule, the heading should not be abbreviated. You may use abbreviations in subheadings.

Here is a solved example:

The coffee plant, an evergreen shrub or small tree of African origin, begins to produce fruit 3 or 4 years after being planted. The fruit is hand-gathered when it is fully ripe and a reddish purple in colour. The ripened fruits of the coffee shrubs are processed where they are produced to separate the coffee seeds from their covering and from the pulp. Two different techniques are in use: a wet process and a dry process.

First the fresh fruit is pulped by a pulping machine. Some pulp still clings to the coffee, however, and this residue is removed by fermentation in tanks. The few remaining traces of pulp are then removed by washing. The coffee seeds are then dried to a moisture content of about 12 per cent either by exposure to the sun or by hot-air driers. If dried in the sun, they must be turned by hand several times a day for even drying.

In the dry process the fruits are immediately placed to dry either in the sun or in hot-air driers. Considerably more time and equipment is needed for drying than in the wet process. When the fruits have been dried to a water content of about 12 per cent the seeds are mechanically freed from their coverings.

The characteristic aroma and taste of coffee only appear later and are developed by the high temperatures to which they are subjected during the course of the process known as roasting. Temperatures are raised progressively to about 220-230 degrees C. This releases steam, carbon dioxide, carbon monoxide and other volatiles from the beans, resulting in a loss of weight of between 14 and 23 per cent. Internal pressure of gas expands the volume of the coffee seeds from 30 to 100 per cent. The seeds become rich brown in colour; their texture becomes porous and crumbly under pressure. But the most important phenomenon of roasting is the appearance of the characteristic aroma of coffee, which arises from very complex chemical transformations within the beans. The coffee, on leaving the industrial roasters, is rapidly cooled in a vat where it is stirred and subjected to cold air propelled by a blower. Good quality coffees are then sorted by electronic sorters to eliminate the seeds that roasted badly. The presence of seeds which are either too light or too dark depreciates the quality.

COFFEE AND ITS PROCESSING	
	<u>1. Fruits of Coffee plants</u>
	1.1 prod. fruits after 3-4 years
	1.2 ripe fruits hand- gathered
	1.3 processed to separate covering from pulp
	1.4 2 types of process- wet & dry
	<u>2. Wet process</u>
	2.1 fruits pulped by machine
	2.2 remaining pulp removed by ferm.
	2.2 seeds dried to moisture cont. of 12 %-exposure to sun /hot-air dryers
	2.3 hand- turned several times for even drying in sun
	<u>3. Dry Process</u>
	3.1 fruits immed. placed in the sun/ hot air-dryers
	3.2 requires more time than wet process
	3.2.1 dried to 12% - mechanically freed from coverings

	4. <u>Roasting</u>
	4.1 Temps. raised to 220-230 degrees C
	4.2 releases steam, CO ₂ , CO- leads to wt. loss- between 14-23 %
	4.2.1 internal gas pressure expands volume of seeds
	4.2.2 rich brown, porous & crumbly seeds
	4.3 aroma appears from chem. transformations
	4.4 rapidly cooled- sorted by electric sorters- bad seeds eliminated

SUMMARY

The coffee plants produce fruits after 3- 4 years. The hand- picked fruits are then processed. In the wet process, the fruit pulps are removed by a machine and further by fermentation. The coffee seeds are then dried in the sun or in hot driers. In the dry process, they are directly sun dried till the moisture content is optimum. The coffee seeds are subjected to a lot of chemical changes and this lends it the aroma. The roasted seeds are sorted to remove the bad ones.

Summary- 3 marks

Practice Question:

Read the following passage.

For many of us, our lives are composed of millions of meaningless moments, all strung together perhaps with a sprinkling of sacred moments mixed in. I am sure you can think of a few sacred moments in your own life.

May be your marriage, the birth of your child or perhaps a heartfelt moment of connection with good friends - these are the moments when we are consumed with joy and awe. At these moments, we are fully present in the moment. We aren't worrying about tomorrow, or trying to rush through the experience to get to the next. We are in the now, and the now is amazing.

Why do we wait for major events to honour these sacred moments? Why can't every day be sacred? Each moment is sacred, if we decide to make it that way. I stated above that our lives are filled with meaningless moments, but those moments are meaningless only because we don't honour them. We

are hurrying along, focused on other things, not stopping to notice them at all. They come and go without any acknowledgment from us. Honoring the sacred means simply choosing to make each moment count. It is a tiny shift in perception that assigns meaning and importance to each moment. It means stopping to notice the beauty and love around us, and within us. It means being fully present in each moment, because only the present moment truly exists.

So many of us worry about the future, hold regrets about the past, and completely ignore the present. When we give the now our full attention even mundane tasks can take on an aura of holiness. Then our lives become millions of meaningful moments. Nothing has changed except our perception, but it makes all the difference.

How do we change our perception to one of sacredness? What does it mean to stay in the present moment? Let's use an example : washing dishes. When most of us wash dishes, we hurry through it, often thinking about the million other things we need to get done that day (or the next day). Our minds are scattered all over the place, focusing on everything but what we are doing. Who can blame us? Washing dishes is not the most exciting experience. However, if we choose to make it a sacred experience, we will want to focus on it.

We want to take our time and really pay attention to how the water feels on our hands, how the soap cleanses away the grease and grime, and the sense of satisfaction we get as each dish moves from the dirty pile to the strainer, now clean and shiny.

Maybe that still doesn't sound very thrilling. Let's look at what else is happening. It doesn't matter what we're doing or not doing in each moment of our lives, It matters only that we become aware of our own state of Being. In those moments, we are fully alive and conscious. We are connected to everything, and we are one with everything.

Have you ever embarked on a walking meditation? This can be great practice to help you honour the sacred in your own life. Many of us walk for health or recreation, but we can also walk for spiritual awareness. A walking meditation is a slow focused walk where you give your full attention to each step you take, the feel of your muscles working, your breathing, and even your surroundings, especially if you walk someplace in nature, a place with lots of trees and wildlife. The trick is to not let your mind wander, but stay focused on the now. It can take practice, but once you accomplish it, you will return from your walks fully refresh and revitalized.

(α) On the basis of your reading of the above passage make notes on it using recognizable abbreviations wherever necessary. Use a format you consider appropriate. Supply a suitable title.

(β) Write the summary of the passage in about 80 words
