Qns

I. Read the passage carefully and answer the questions that follow:

Annie pointed to a rusty pipe sticking out from the top of a small hill. Streaming from the pipe was a column of black smoke. "Let's check it out" said Annie. She and Jack walked up the little hill. At the top they saw that the rusty pipe was rising out of a wooden roof. Beneath the wooden roof was a door. The door seemed to open into the hill itself. Jack studied their research book and read aloud: Since the prairie did not have many trees, wood was hard to find. So pioneers often made their houses out of sod bricks, which were blocks of earth cut out of the prairie. Sometimes a sod house was dug out of the side of a hill. It was called a "dugout". Then Jack read more to Annie: Tornados or twisters are common on the prairie. So many dugouts had storm cellars. A storm cellar was like a basement below the ground. During a twister, a storm cellar is the safest place to be.
