SECTION B: SUBJECTIVE

V. ANSWER THE FOLLOWING QUESTIONS:

- 1. What can the doctors see with the help of scanners? 1**

 - With the help of these machines, doctors can see images of bones and internal organs and find out the disease a patient is suffering from.
- 2. Why we should not use Coal as a source of energy? 1**

 - Coal is formed in nature from dead trees, but it takes millions of years to form and the amount of Coal on earth is limited.
- 3. What do you mean by Pasteurisation 1**

 - ☐ The process of killing germs by boiling followed by rapid cooling, especially in milk, is called pasteurisation
- 4. What do you know about the Clinical thermometer? 1**

 - It measures the temperature of the body in degree Celsius or degree Fahrenheit.
- 5. Why does the doctor examine your chest and back with a Stethoscope? 2**

 - The doctor is able to listen to the sound of your heart and your breathing through the instrument.
 - It helps him to find out what you are suffering from.
- 6. What is meant by Industrial Revolution that began in Britain in the 18th century? 2**

 - The significant change from hand-made goods to machine-made goods is known as Industrial Revolution.
 - We use the term 'revolution' because of the large-scale changes it brought about in our economy, society and culture.
- 7. What caused the increase in the demand of goods leading to the beginning of the Factory System? 2**

 - With the invention of the large steam-driven machines, goods could be produced in large quantities.
 - These goods were cheaper and better qualities, so more people bought them.
