

**INDIAN SCHOOL MUSCAT
MIDDLE SECTION
SECOND PERIODIC TEST 2019-20
CLASS 7 - MATHEMATICS (SET-A) – ANSWER KEY**

Q.NO1.	<u>SECTION A</u>
(a)	An exterior angle of a triangle is 100° and one of the two interior opposite angles is 30° . Find the other angle. Ans: $100^\circ - 30^\circ = 70^\circ$
(b)	One of the acute angles of a right triangle is 40° . Find the other acute angle. Ans: 50°
(c)	The lengths of two sides of a triangle are 6cm and 8cm. Between what two measures should the length of the third side fall? Ans: 2cm and 14cm
(d)	Find the measure of each angle of a triangle LMN, if all the 3 angles are equal. Ans: 60°

Q.NO2.	<u>SECTION B</u>
(a)	Construct a triangle LMN in which LM = 6cm, MN = 3cm and LN = 5cm. Ans: Drawing LM Arc of MN Arc of LN & completion of the triangle
(b)	Verify if 5cm, 7cm, 9cm can be the lengths of the sides of a triangle. (Show the working) Ans: $5\text{cm} + 7\text{cm} = 12\text{cm} > 9\text{cm}$ $7\text{cm} + 9\text{cm} = 16\text{cm} > 5\text{cm}$ $9\text{cm} + 5\text{cm} = 14\text{cm} > 7\text{cm}$ Yes, given measurements can be the sides of a triangle.
(c)	Construct a triangle PQR, given that PQ = 4cm, QR = 6.5cm and $\angle PQR = 60^\circ$ Ans: Drawing QR Construction of 60° Arc of PQ + Joining the triangle
(d)	In $\triangle PQR$, PR = PQ. Find the values of $\angle QRP$, $\angle PQR$, $\angle RPQ$ <div style="text-align: center;">  </div> Ans: $\angle QRP = 180^\circ - 108^\circ = 72^\circ$ (Linear pair) $\angle QRP = \angle PQR = 72^\circ$ (Base angles of an isosceles triangle) $\angle RPQ = 36^\circ$ (Any reason)
(e)	The three angles of a triangle are in the ratio 5 : 6 : 7. Find the largest angle. Ans: $5x + 6x + 7x = 180^\circ$ $18x = 180^\circ$ $x = 10^\circ$ The largest angle = 70°

Q.NO.	
3.	<p>The hypotenuse of a right triangle is 17cm long. If one of the remaining two sides is of length 8cm, find the length of the other side.</p> <p>Ans: $(\text{hyp})^2 = b^2 + h^2$ $17^2 = 8^2 + h^2$ $17^2 - 8^2 = h^2$ $289 - 64 = 225 = h^2$ $h^2 = 15^2$ $h = 15\text{cm}$</p>
4.	<p>Draw a line parallel to the given line n at a distance of 4.8 cm away from it.</p> <p>Ans: Drawing the line n + perpendicular line Arc at 4.8 cm Construction of 90° Drawing the parallel line</p>
