Practice exercise to be done in the Language note book.

2. 'Mobile phones make you closer to the person far from you, but it takes you away from the ones sitting next to you.' Children of all ages spend so much time on mobile phones that they don't even notice how addicted they become. Write a letter to the editor of The Hindustan Times newspaper highlighting the health hazards that children face with excessive use of cell phones and suggest ways to improve the situation as it is a matter of concern today requiring action. You are Pradeep / Preeti from Mumbai.
