

INDIAN SCHOOL MUSCAT PRIMARY SECTION PERIODIC TEST 2 MATHEMATICS

| GRADE III DATE 27 |   | DATE 27/01/2019                  | SET D      | TOTAL MARKS: 20                                |  |
|-------------------|---|----------------------------------|------------|--|--|
|                   |   |                                  |            |  |  |
| I.                | Choose the correct answer.  |                                  |            | $(12 \text{ x} \frac{1}{2} = 6 \text{ Marks})$ |  |
| a.                | OMR is the national currency of                                   |                                  |            |  |  |
|                   | a. India  | b. Sultana                       | te of Oman | c. Australia                                   |  |
| b.                | If something is divided into 4 equal parts, each part is called a |                                  |            |  |  |
|                   | a. half   | b. quarter                       |            | c. one whole                                   |  |
| c.                | How many centimetres make a metre ?                               |                                  |            |  |  |
|                   | a. 100 cm   | b. 10 cm                         |            | c. 1000 cm                                     |  |
| d.                | The value of $\frac{3}{8} + \frac{4}{8}$ is                       |                                  |            |  |  |
|                   | a. $\frac{1}{8}$  | b. $\frac{7}{8}$                 |            | c. $\frac{3}{8}$                               |  |
| e.                | 0   | als into baiza we should         |            | δ  |  |
|                   | a. multiply b   | y 1000 b. multiply               | y by 100   | c. divide by 1000                              |  |
| f.                | Four parts out of eight equal parts is called                     |                                  |            |  |  |
|                   | a. four - eigh  | ths b. two – ei                  | ghths      | c. six - eighths                               |  |
| g.                | The distance between two cities is measured in                    |                                  |            |  |  |
|                   | a. metres   | b. centime                       | tres       | c. kilometres                                  |  |
| h.                | 4000 baiza = OMR  |                                  |            |  |  |
|                   | a. 4  | b. 40                            |            | c. 400.  |  |
| i.                | The value of  | $\frac{7}{10} - \frac{3}{10}$ is |            |  |  |
|                   | a. $\frac{4}{10}$   | b. $\frac{2}{10}$                |            | c. $\frac{7}{10}$                              |  |
| j.                |   | m                                |            | -  |  |
|                   | a. 90   | b. 9000                          |            | c. 900   |  |

| k. | 2 rials and 200 baiza is  | baiza                      |                 |  |  |
|----|---|----------------------------|-----------------|--|--|
|    | a. 2000   | b. 2200                    | c.22            |  |  |
| 1. | 8000 m =  | _ k m                      |                 |  |  |
|    | a.80 km   | b. 8 km                    | c. 800 km       |  |  |
|    | Do as directed.   |                            | (8 Marks)       |  |  |
| a. | $\frac{12}{45}$ $\frac{19}{45}$   | <b>Insert</b> (< , > , = ) |                 |  |  |
| b. | $\frac{1}{9}$ of $45 =$   |                            |                 |  |  |
| c. | Convert into meters.  |                            |                 |  |  |
|    | 8 km 500m =   | m                          |                 |  |  |
| d. | Arrange the following fractions in descending order.  |                            |                 |  |  |
|    | $\frac{31}{34}$ , $\frac{17}{34}$ , $\frac{23}{34}$ , $\frac{21}{34}$   |                            |                 |  |  |
| e. | <b>Add</b> $\frac{13}{30} + \frac{1}{30} + \frac{9}{30}$  |                            |                 |  |  |
| f. | Convert into centimeters.   |                            |                 |  |  |
|    | 19m 3cm =   | cm                         |                 |  |  |
| g. | Convert into meters.  |                            |                 |  |  |
|    | 4500 cm =   | m                          |                 |  |  |
| h. | Convert into metres and centimetres   |                            |                 |  |  |
|    | 828 m = m   | cm                         |                 |  |  |
| II | Read carefully and solve  | е.                         | ( 3x2=6 Marks ) |  |  |
| a. | Marina needs $\frac{4}{5}$ cup of flour for making bread .She has $\frac{1}{5}$ cup of flour .<br>How much more flour does she need ? |                            |                 |  |  |
| b. | Sam had OMR 10 with him. He bought a pen for OMR 2.500 and a book for OMR 5.500. How much money is left with him now?                 |                            |                 |  |  |
| c. | Ravi read $\frac{2}{7}$ of a book yesterday and $\frac{1}{7}$ of the book today. What fraction of the book did he read in two days ?  |                            |                 |  |  |
