

WORKSHEET: 5

Topic: What Are Things Made Of?

1. List any three things that we get from Plants, Animals and Earth.

Plants: Rubber, Paper and Cotton

Animals: Leather, Wool and Silk

Earth: Metal, Plastics and Petroleum

2. Why should we not use too many things made of plastics?

Plastics last for a long time. They stay in the soil and pollute it. So we should not use too many things made of plastics.

3. Name any three products that we get from petroleum.

Kerosene, Wax and Vaseline.

II. Give Reason.

1. Can we make clothes with paper ? Why or Why not?

We cannot make clothes with paper. This is because paper is more fragile and tears easily. It does not protect us from rain and wind.

2. Rubber is not usually used to make chairs and table.

This is because rubber can be easily stretched. So it cannot be used to make chairs and table

III. Identify the material used to make the objects given below.

a. metals

b. wood

c. clay

IV. Look at the picture answer the following questions.

a. Identify the material used to make the given objects. Leather

b. Where do we get this material from? Animals

c. Name two more objects that can be made of the same material. Shoes and Belt
