| 1. | vviicie is ravi | | | | | |

IX. Read the passage carefully and answer the questions.

(Total - 4)

Nile crocodiles are usually about eight and a half metres long and weigh about one thousand kilos. They hunt animals such as goats and small cows for their food. Baby crocodiles come from eggs. Crocodiles are very good mothers. When the baby crocodiles come out of their eggs, the mother crocodile takes them carefully in its huge mouth and carries them into the water. Most animals are frightened of crocodiles but some little birds are not. They walk inside the crocodile's mouth and eat the meat between its teeth. Crocodiles let the birds do this because it keeps their teeth clean.

| I. Underline the correct ans | swer. | | (2) |
|------------------------------|---------------------------------|--------------------|-----|
| 1. Crocodiles weigh about o | one thousand | | |
| (i) grams | (ii) kilos | (iii) centimetres | |
