

INDIAN SCHOOL MUSCAT PRIMARY SECTION		
SUBJECT: Mathematics	NAME:	
TOPIC: Model Question Paper II	CLASS: III	SEC:
TEACHER'S SIGNATURE:	ROLL NO:	DATE:

I. Fill in the blanks.

- A rectangle has _____ sides and _____ vertices.
- $\frac{1}{2} l$ _____ $\frac{1}{4} l$ (Insert $<$, $>$, $=$)
- $\frac{1}{2} \text{ kg} =$ _____ g
- 8 kg = _____ g
- 6000ml = _____ l
- Weight of a toffee would be measured in _____.
- 8080 g = _____ kg _____ g
- There are _____ edges, _____ corners and _____ faces in a cube.
- A solid shape having two flat faces and one curved face is _____.
- The unit used to measure the weight of a tennis ball is _____.

II. Draw a line segment of length 7 cm.

III. Observe the patterns and write the next 3 numbers.

19, 16, 13, 10 _____ _____ _____

15, 19, 23, 27 _____ _____ _____

IV. Name three things which weigh less than a kg.

V. a. Add

b. Subtract

kg		g		l		ml	
1	4	5	3	3	2	2	6
+	6	6	4	7	5	0	4

VI. Read carefully and solve.

A bucket has capacity of 10 litres . Sita filled 3l 650 ml of the container. How much water should be poured in the vessel to fill it?	

VII. Do as directed.

a. Convert into grams	b. Convert into millilitres
7 kg 50g	4l 20 ml
