- b. A book is an example of a luminous object.
- c. A force can make a moving body stop.

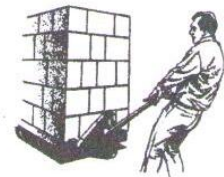

IV. Draw the structure of the Earth and label the different layers.

V. Answer the following questions.

1. a. What is force ? How does it help us?

A push or pull is called force. It can move an object, stop a moving object, change the direction of a moving object and can change the shape of an object.

b. Why does the Moon appear to change its shape?

When the Moon goes around the Earth different parts of it are lit by the Sun on different days. So we can only see the part of the Moon that receives sunlight. Thus it appears to change its shape.

2. Write any two differences between Rotation and Revolution

Rotation	Revolution
1. It is the movement of the Earth on its axis.	1. It is the movement of the Earth around the Sun.
2. It causes day and night.	2. It causes seasons.

VI. Give reasons.

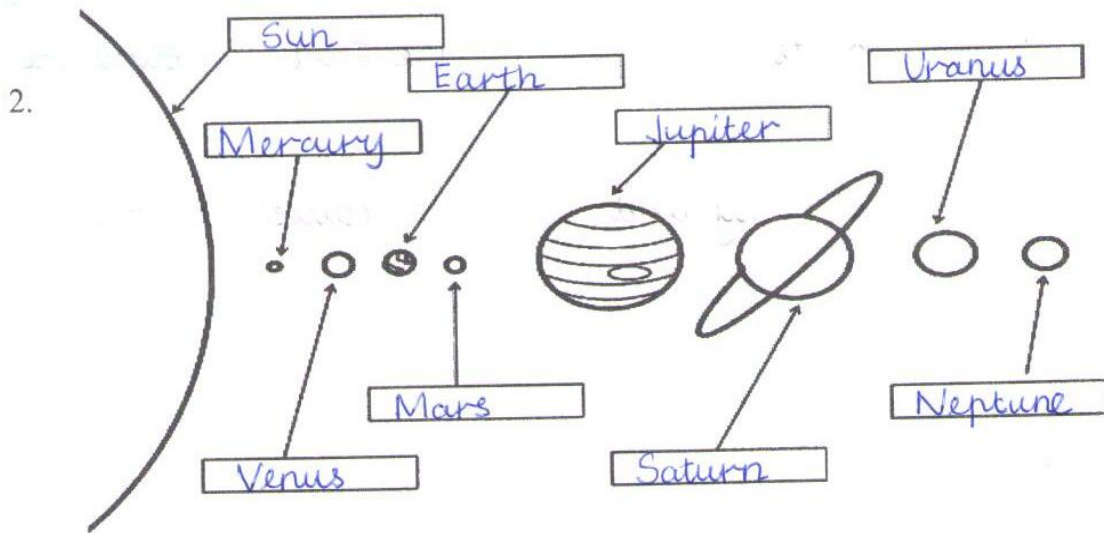

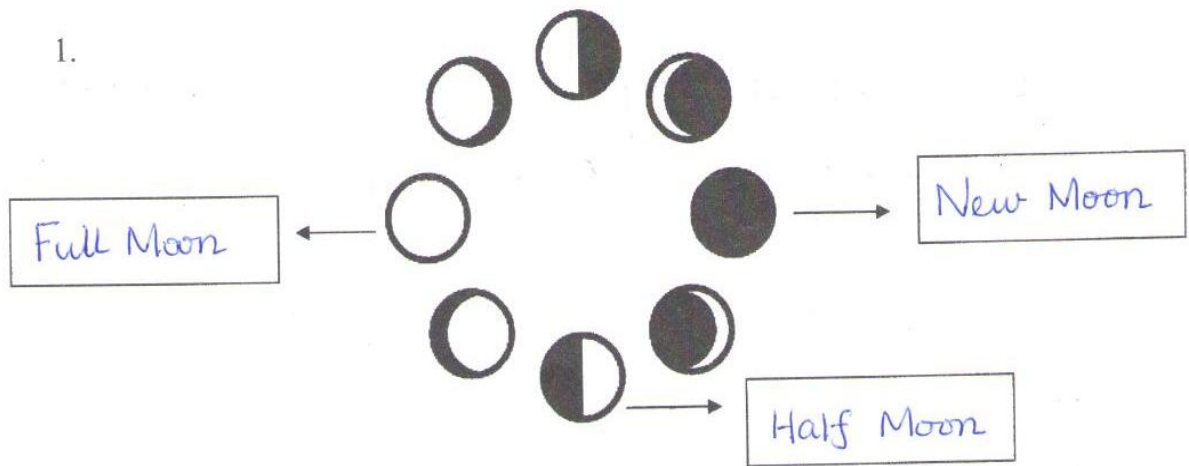

1. Stars look small in the sky.

This is because they are very far away from the Earth.

2. Petrol is filled in cars.

This is because it gives energy to the cars to move.

VII. Label the diagrams given below.

VIII. Life Skill.

How can we be eco-friendly?

Put a tick for the right options.

- a. Use paper or jute bags to carry things.
