FROM THE PRINCIPAL'S DESK

In an ever-changing global society, a school is the only institution that not only helps to pursue academic excellence but also motivates and entitles its students to be learners forever, think critically and be socially productive members. We at ISM provide an atmosphere to our students for all round development, where each child is encouraged to direct their potential in the pursuit of excellence. The abilities of each student is identified and groomed so that he/she is able to reach greater heights. Children need a supportive environment at home and at school. They need to set goals, within their reach until they gain confidence and determination. With academic excellence as our priority, the school is also devoted to prepare the students for life, groom them to face the challenges of tomorrow and encourage them to be socially relevant. We strive to live up to this ideology and ensure that the children grow to their full potential. The parents are the strongest power in shaping the future of a child. Their consistent support empowers us to do more and more. I pay my gratitude to them for their faith in us.

Dr Rajeev Kumar Chauhan

Principal

FROM THE VICE PRINCIPAL'S DESK

Education is a shared commitment between dedicated teachers, motivated students and enthusiastic parents with high expectations

--Bob Beauprez

ISM Pre-primary section is a place where we have the vision of raising achievement, raising aspirations and enriching partnerships. We have built a reputation for the quality of its work by developing teaching and learning opportunities.

The achievement of our students is built upon the partnership between students, parents and staff. Through the quality of the teaching and learning, we create the building blocks of success.

The school has chosen to place itself at the forefront of educational development, the focus on developing learning environments and a commitment for Kindergarten beginners to be inclusive, with unique ways to help all the students to continue their learning. We want to continue to create the opportunities for all to succeed.

We are proud of our innovative and rich curriculum. We place a strong emphasis on working with parents and the community, enabling all students to maximize their abilities, ambitions, and academic potential in everything they do.

Mrs. Prema George

Vice Principal (PrePrimary Section)

REPORT OF EVENTS

Kindergarten is a place where we teach a multitude of knowledge levels, as some students enter kindergarten with basic skills while others enter a classroom setting for the first time.

Kindergarten-aged children are testing social boundaries for the first time. Our objective is to teach socially acceptable behavior in a way the young children can comprehend. This is accomplished through sharing activities, learning to take turns, and respecting the privacy and belonging of others.

Reading skills are enhanced by identifying and learning sight words, recognizing letters and sounds, and providing instruction through matching and sorting exercises. Basic math skills is taught through practices such as number recognition and learning to count to 20, ideally to 100, and in increments of 2s, 5s and 10s. Students learn through grouping and sorting activities, playing math games, and through basic addition and subtraction exercises. Encouraging creativity and individual expression is an objective of kindergarten curriculum. Schools that offer music, movement and art programs allow teachers to help students explore different forms of expression. These skills are showcased through our special assemblies. Awareness and care for the environment is developed through the Earth day assembly.
