	Interactional, bio, Psycho-social approach.	
	<b>PART - E</b>	
27	<p>According to Dr. Sigmund Freud defense mechanisms are ways in which the ego unconsciously tries to cope with unacceptable libidinal desires and resolves conflicts. It distorts reality to resolve conflicts and therefore provides temporary relief. Its optimum use is healthy but excessive usage lead to maladjustment. Defense mechanisms are regulated by the ego. It is different from lying because lying is intentional but use of defense mechanism is unconscious.</p> <p>The defense mechanism is described by Freud are:  Repression,  Regression,  Displacement,  Projection,  Denial,  Rationalization. (should be explained in detail)</p> <p style="text-align: center;"><b>(OR)</b></p> <p>Humanistic theories emphasise personal responsibility and innovate tendencies toward personal growth. They focus on the importance of people's subjective attitudes, feelings and beliefs especially with regard to the self.</p> <ol style="list-style-type: none"> <li>i) According to humanistic approach we human beings are most creative, growin, fully functioning and self actualizing people.</li> <li>ii) Fully functioning persons, according to Rogers theory, Psychologically healthy persons who live life to the fullest.</li> <li>iii) According to Rogers fully functioning persons live in the here and now and who trust their own feelings. They are sensitive to their own feelings. They are sensitive to the needs and reflects of other but they do not allow society's. Standards to shape their feelings or actions to an excessive degree.</li> <li>iv) Rogers suggests that each individual has a concept of ideal self. If there is discrepancy between real self and ideal self than individual develops maladjustment.</li> </ol>	6
28	<p>Stress is a silent killer and it is necessary to manage the stress in a good way through the support of various methods or techniques. Some of the important methods and techniques of stress management are  Relaxation techniques  Meditation procedures  Biofeedback  Creative visualization  Cognitive behavioral techniques  Exercise</p> <p style="text-align: center;"><b>(OR)</b></p> <p>Life skills are abilities for adaptive and positive behavior that enable individuals to deal effectively with the demands and challenges of everyday life.
