1. Ideas rule the world. You shape your fate and decide your destiny by your thoughts. You have to think high to rise. You have to believe and be sure of yourself to win a prize. Life's battles do not always go to the stronger or the faster man. But, sooner or later, the man who wins is the man who thinks he can.

2. Success starts with your thoughts. Whatever your mind can conceive and believe, it can achieve. And your mind is nothing more than a bundle of thoughts. Since you have the power to shape your thoughts, you automatically have the power to fashion your fate and decide your destiny. Thus, your thoughts are the most potent, powerful and prime source of your success.

3. For your thoughts to blossom into success, they should be combined with definiteness of purpose, perseverance and a burning, pulsating strong desire to translate them into action. Believe that you will succeed and believe it firmly. You will then do whatever is necessary to bring success about.

4. Faith in yourself as well as the confidence that you can and will succeed are the key to your success in any venture. If you keep your mind riveted on your goal and focus your thoughts on the great and splendid things that you wish to have, you will find yourself unconsciously seizing upon the opportunities, that are required for the fulfillment of your desires.

5. Thoughts are supreme. Preserve the right mental attitude of courage, frankness and good cheer. Think of success in your work and you will then do automatically and unconsciously, the things necessary to bring success about. If your desire is weak and your efforts are erratic your achievements will also be slight and fleeting. But, if you go after your goal with the single-mindedness of a bulldog after a cat, nothing and nobody under the sun can stop you. Your goal should also be well-defined, clear-cut and specific and should be linked to a fixed timeframe, so that your definite energies and efforts can be focused and forcefully directed towards its attainment. Success is then a sure bet!

1. Advertising was initially meant to make people aware of the goods available in the market. It was as simple as announcing what you have in your store or the services you offer in your premises. Over the years, advertising has evolved into a major industry that beyond informing to persuading and influencing. It is a form of brainwashing consumers.

2. Advertising has become a type of culture with ardent followers. In the process, it attracts enviable attention from manufacturers and service providers who fancy an edge over their competitors. Unfortunately, in keeping with the ever-increasing demands of the manufacturers, the advertisers have resulted to creating unnecessary wants and excess consumption in most of us. This is a craving for harmful products that we are better off without. It preys on our minds rendering us completely irrational. The billboards (hoardings), television and radio advertisements target us from a very early age, forming our view of the world as we grow into adults. The buzzwords in advertising are, 'you are cool and sophisticated', if you use this or that product.

3. The notion that the media is primarily in place to give us news is not very true. If the truth may be told, the media is there to gather enough audience, package them into a pricey commodity and sell it to the advertisers. The advertisers, on the other hand, are always on the lookout for a target audience to persuade them that this product of service is better than that of the competitor.

4. Advertising does influence people. Most of the advertisements are filled with images that equate emotional well-being with material acquisition and associate independence and leisure with consumption of alcohol. Advertising also makes people lavish their own products rather than real people, thereby destroying human relationships. We have become trapped in the web of advertising where products like brands of beer and cigarette take over our minds, doing away with our core family values.

5. When you look critically at most of the advertisements on the television, you will discover how persuasive the advertisers are in deciding for us what, when, how much and why to buy. But most people think that they are not influenced by advertisements. This is precisely what the advertisers

want us to think, that in the end 'the people decide'. If you think deeply, nobody in this profit minded sense will pay so much money to make a thirty second advertisement, which might not be seen by a hundred people, leave alone convince them to buy. How we strike a healthy balance between the two will definitely have a direct bearing on the future of our country.
