36. (i) Total members $=6$
$\because$ Room $A$ is double share room.
$\therefore \quad$ The number of ways in which room $A$ can be filled
$=\binom{6}{2}=\frac{6!}{2!\times 4!}=15$
(ii) Now, rooms $A$ and $B$ can be filled with 2 members each and room $C$ can be filled with 1 person.
$\therefore$ Required number of ways $={ }^{2} C_{1}=2$
(iii) Required number of ways $=\binom{6}{2} \cdot\binom{4}{2}\binom{2}{1}\binom{1}{1}$

$$
