According to the famous Swiss psychologist Jean Piaget, “Knowledge is a consequence of experience.”

The old-school model of passively learning facts and reciting them out of context is no longer sufficient to prepare students to survive in today's world. Students must possess the 21st century skills like teamwork, problem solving, research gathering, time management, information synthesizing, utilizing etc. With these combination of skills, students become directors and managers of their learning process, guided and mentored by a skilled teacher. Projects encourage conceptual learning, creativity and self-motivation.
